

AICTE

CS Lab Manual

Introduction

Welcome to your favorite AICT Lab. In this lab manual, we shall work together to learn and implement new computing concepts.

Skills to be learned:

- MS Office

MS WORD– Document formatting, tables/images, mail merge, references, collaboration.

Week 2	Computer Components Use MS-WORD: ● To write Application to the chairman ● To write Paragraph on first day fooling ● To Design and create three folds pamphlet ● To Create Bio-data form	CLO 1
-----------	--	----------

Let's do some computing

Good Luck and Best Wishes !!

Happy Computing ahead :)

INTRODUCTION TO MS WORD

Figure 1-MS word program window.

MS word is a program used to create, edit and save professional documents such as reports, applications, resumes etc. It has many powerful features that make it easy to use and give a

AICTE

CS Lab Manual

professional look to your documents. Its important parts include menu bar, standard toolbar, title bar, formatting toolbar.

Title bar:

Title bar contains the name of the document. The buttons on its right side are used to minimize, restore, maximize and change the display of ribbon.

Cursor:

The vertical blinking line which indicates where text and objects will be inserted.

Menu bar:

The menu bar contains all the menus of words which have many useful features.

Standard toolbar:

The standard toolbar contains the shortcut of most widely used

features. **Formatting toolbar:**

It is used to format the text. It can make text bold, italics and underlined. It is also used to change the colour of text.

Scroll bar:

It is used to scroll the document.

Status bar:

It shows the status of different toggle keys and actions being performed in the document.

STARTING MS Word

Ms Word can be started by clicking the start button and then all programs and selecting Ms Word from Ms Office or you can type **WinWord** on the search windows search bar to start Ms Word. Select the blank document & a new document will be opened.

AICT

CS Lab Manual

Figure 2-blank document

Some Important features of MS Word

File tab: File menu has many important features which includes save which is used to save documents, open used to open saved documents, new used to open new blank document and print used to print documents.

Insert tab: It has many options like inserting table, pictures, smart art, charts, header and footer.

AICT

Home tab: It is used to change the appearance of text. It can make text bold, italics and underlined. It is also used to change the colour spacing and alignment of text.

Figure 3-font group and text effects

Figure 4-alignment buttons

Design tab: It contains commands related to changing the overall appearance of a document such as page borders, page colours and watermark etc.

Exiting Ms Word

You can exit a word by clicking the close button in the upper right corner of the title bar.
or by selecting file menu and click on the exit option

AICTE

Some most widely used short-cut keys:

Ctrl+P Printing a document

Ctrl+V Paste

Ctrl+X CUT

Ctrl+C Copy

Ctrl+Z Undo an action Ctrl+Y Redo an action Ctrl+O Open
a new document Ctrl+S Saving a document

CS-141L Introduction to computing

Write an application to the chairman of the department for the change in discipline.

Objectives

To get familiar with Microsoft word environment and get to know how to make simple documents using formatting features of Ms Word.

Processing steps

Opening blank document

1-Start Ms Word from the **start button** as mentioned above. And open a new document by clicking on new option and selecting the blank **document**.

AICTE

CS Lab Manual

Figure 5-new document

2-Start typing in the blank working area according to the given

format. **Formatting text**

3- Appearance of documents can be changed. You can make the heading bold, italics and underlined. Select the text you want to format. On the **Home tab** from the font group, font size and style can be changed.

Figure 6-font group

Font size can be changed by clicking the font size arrow and selecting the desired font.

AICTE

CS Lab Manual

Figure 7-font size

5-Font style can be changed by clicking the font arrow and selecting the desired one.

*Figure
8-font
style*

6-Change Indentation and alignment of the text if needed. The text in the application can be left, right, centre and justified. **Indentation** of the paragraph can be increased or decreased. All this can be done from the Home tab in the paragraph group.

Figure 9-paragraph group

Saving document

5-After all the formatting, the document can be saved. To save a document click on the File menu and then select “**Save As**”. Click on the Save As button.

AICTE

CS Lab Manual

Figure

10-saving a document

6- The save as dialog appears. Enter the name of the file in the bar next to **File Name**. And in the “**Save As Type**” box enter the format in which you want to save the file. Then press OK, the file will be saved.

AICTE

CS Lab Manual

Conclusion:

After following the above steps, users would be able to create, format and save applications. Users can make Professional documents with these simple steps. These are the most basic operations; one can perform using Ms Word.

CS-141L Introduction to computing

Design and create a 3-fold pamphlet using MS-word.

Objectives

To learn how to use MS-word template and create your own document in a desired format. **Processing steps**

Start MS-word. Click on the **File** tab and then **new** option.

Using template

To select **template**, go to the **File** tab and click **New**. Click on sample template or search flyer in the search bar.

1. Select the **flyer** template as follows.

Figure 28-using flyer template

2. Make changes in the template according to requirement. **Insert pictures** in the pamphlet and format them if required.
3. Add text related to the task and format it. Change **font colour** and **font size** if required.

AICT

CS Lab Manual

Applying bullets and numbering

1. Add bullets to the key offerings in the pamphlet. To do this select the text and then in the home tab in the paragraph group select the bullets and numbering option to apply them.
2. To change **bullets and numbering** click the arrow in the bullets and numbering button and select the desired look.

Figure 29-changing bullets

CS Lab Manual

Figure 30-changing numbering

**Applying and
formatting
borders and**

shading

Add borders and shading to your text. Select the text and then in the **Paragraph group** click on the button to apply borders and on the button to apply **shading** to the text.

Paragraph group click on the button to apply borders and on the button to apply **shading** to the text.

Figure 31-shading palette

Figure 32-borders

AICTE

CS Lab Manual

At the end check the print preview of the **pamphlet** and **save** it with the specified name at the specified location.

Conclusion

After following the above steps, we can learn how to use Ms Word template and make changes in it. How to add bullets and numbering in the documents and how to apply borders and shading to the selected text.
